

### equipment needed:

PA with 2 speakers  
2 x audio recordings of dripping  
1 x kitchen basin / bowl  
1 x bottle filled with water  
1 x masking tape

### set up:

using the masking tape, mark out a space for the audience to sit - so that they are in between the two speakers.. soloist should be placed in amongst the audience. where possible, have windows or a door open, to allow outside noise, in.

### lighting:

vague bit of lighting on corners of the roof located above pa that increase with the sound coming from that source. and turns off , when the sound disappears.
